Apopka, Florida 32703
407-703-1718

Completion Date: ongoing
Project Fee: \$20,000

PROJECT SIMILARITIES

- ▶ CMS Update
- ▶ Level of Service Issues

Under this contract LTEC completed annual updates to the City of Apopka's Concurrency Management System (CMS).

LTEC has been responsible for the Update to the City of Apopka's Concurrency Management System (CMS) for a number of years ranging from 2001 to 2004. As part of this work, LTEC coordinated closely with the City staff to conduct a combination of twenty-four hour and seventy-two hour roadway segment traffic counts at over one hundred (100) locations within the City. This included State, County, and City roadways.

This work involved the review and incorporation of traffic count data obtained from Orange County. LTEC also conducted 24-hour and 72-hour traffic counts at numerous locations throughout the City of Apopka.

Using the traffic count data and trip information for approved land developments, LTEC has updated the City's CMS Worksheet. LTEC also provided expertise in assisting the City staff in re-evaluation of roadway service volumes to address Level of Service issues.
